Project 1 Launch and Outline

Purpose

Today your group will launch Project 1 and work directly on the **Deliverable 1 outline**. By the end of lab, your shared Google Doc should contain a complete first draft that your group can revise and submit.

Shared Google Doc Setup

1. Create one Google Doc for the group and name it **P1.GroupNumber.Outline**.
2. Share the document with all four group members and the instructor/TA with editing access.
3. Add all four names and BUIDs at the top. Use headings that match the Deliverable 1 outline.
4. Work in the same document throughout lab; do not create four separate drafts.

Group-of-Four Roles

- **Member 1 – Project lead:** title, background, and motivation.
- **Member 2 – Data lead:** data source, key variables, observations, and limitations.
- **Member 3 – Analysis lead:** research questions, objectives, hypotheses, and initial analysis plan.
- **Member 4 – Editor and scheduler:** timeline, task assignments, formatting, and final quality check.

In-Class Work

- (A) Project orientation.** Review the Project 1 overview and rubric together; confirm the required sections and final submission format.
- (B) Choose the data.** Agree on one data set that can support a statistical analysis and model application. Record its source and access information.
- (C) Draft the questions.** Write at least two possible research questions or objectives, then select the primary question.
- (D) Build the analysis plan.** Identify a response variable, candidate predictors, first summaries or plots, and any likely limitations.

(E) **Peer edit.** Each member reads the complete draft and adds one specific improvement or clarification.

(F) **Check-in.** Ask the instructor/TA to review the primary question, data source, and feasibility of the proposed analysis.

Deliverable

Submit the completed Project 1 outline through Gradescope or Blackboard by Tuesday, September 22 at 10:00 PM. Your shared Google Doc must contain:

- project title and all four group members;
- background and motivation;
- research question(s), objectives, or hypotheses;
- data source, key variables, observations, and limitations; and
- timeline and roles for the remaining project work.

Before submitting, confirm that every member has contributed, the document is readable without comments, and the final link is accessible to the instructor/TA.
