Project 1 Presentation and Final Work Session

Purpose

Today you will refine your Project 1 analysis, prepare presentation materials, and practice communicating statistical results and limitations clearly.

Shared Group Workflow

Use one shared Google Doc for the presentation script and one shared folder for slides, code, data, and figures. Assign the four roles below; every member must rehearse and review the final materials.

- **Member 1 – Story lead:** motivation, data, and opening slides.
- **Member 2 – Results lead:** model results, key plots, and statistical interpretation.
- **Member 3 – Presentation lead:** limitations, conclusion, timing, and rehearsal.
- **Member 4 – Reproducibility editor:** code, figures, file organization, and final submission check.

In-Class Work

- (A) **Finalize results.** Confirm your final model, plots, and interpretation.
- (B) **Build slides.** Prepare a concise presentation with motivation, data, method, results, limitations, and conclusion.
- (C) **Practice.** Rehearse the presentation and identify where wording or visuals need revision.
- (D) **Code and files.** Confirm that submitted code runs and that all figures or tables are reproducible.
- (E) **Check-in.** What is the one result your audience should remember?

Deliverable

Submit the Project 1 final presentation materials or video through Gradescope or Blackboard by Sunday, October 11 at 10:00 PM. Include the shared Google Doc/script link and confirm that all four members contributed and rehearsed.
